

## CANTILEVER RACKS

The Cantilever racking systems is excellent for large, bulky, long or oddly-shaped materials such as pipe, bar, round and square tubing, steel angle, lumber, poles, steel plate, wood, sheet steel, structural steel, etc. It offers an efficient way to organize and store bulk items. These racks increase space utilization. Available as either single sided or double sided, and in a variety of capacities and sizes to fit your specific storage requirements.

### FEATURES

- | All material components are made of structural steel
- | Offers greater storage weight capacity that non-structural cantilever rack
- | 4" vertical adjustability
- | Impact resistant construction
- | Can be equipped with deck supports and wood for flat surface storage of furniture or large case goods
