

ROLL-FORMED STEP BEAMS

Pallet rack roll-formed step beams support palletized loads and non-palletized loads/cases in storage rack systems. The beam step allows for the inclusion of pallet supports or various forms of decking (wire, wood, corrugated metal, etc.); which is necessary for non-palletized load storage. Step beams are available in a variety of standard lengths and beam face heights, which creates a large array of individual load-bearing capacity beams. In addition, step beams can be customized for specialty applications such as push-back, pallet flow or pick module racking. Care should be taken in the selection of beam

types, to ensure that all design engineering and code-compliance requirements are accommodated.

FEATURES

- | 1-5/8" Beam Step Height
- | Universal Connectors
- | Powder-Coated Paint (Most RAL colors)
- | 'Pull Pin' Safety Clip (avoids beam dislodgement)
- | Interchangeable with certain brands
- | RMI Approved

PRODUCT INFORMATION

STEP BEAMS	DESCRIPTION
BEAMS LENGTHS:	48"-192"
GAUGE THICKNESS:	14 & 16
PIN QTY/CONNECTOR	3 & 4
BEAM FACE HEIGHTS:	2-1/2", 3", 3-1/2", 4", 4-1/2", 5", 5-1/2", 6"
STOCKING COLOR:	Orange

Note: Beam Drops and Adjustable Beams Available Upon Request. Additional Colors Available Upon Request. Customize to Order.

BEAMS 16 GAUGE - 3 PIN

Notes:

Capacities Based Upon Pair of Beams · Capacities Are Determined Per ANSI 2012 and RMI 2012 · Design Engineer Must Be Consulted For Loads of 10,000 lbs. or more
Uniform Distribution of Weight Is Assumed Along The Entire Length of Both Beams · Capacities Are For Static Loads Only. Consult Seismic Engineer For Seismic Loads
Values Shown Reflect The Capacity of The Beams Based On The Lesser of It's Strength In Bending or L/180 Deflection Criteria. Metrics table is measured in pounds.
Consult UMH or E.O.R. for 192" Beam Capacities. Drop beams, adjustable beams and other engineered beams available upon request. 2-1/2" face height beam is standard in 16 gauge only.
