

GRAVITY CONVEYOR

United Material Handling, Inc. Gravity Roller Conveyors are an inexpensive location to freely move goods at any stage of a warehouse. Remove strenuous manual handling activities, by ensuring your workplace adopts a conveyor to move goods over long distances. Able to move heavy cartoned items, these conveyors are a crucial part in manufacturing and packaging lines. The units are incredibly flexible as they feature innovative interlocking sections.

This allows for the addition (or subtraction) of a conveyor length. Load sizes will determine which roller pitch is required on your conveyor system. Customized conveyor systems are available upon specification.

Non-powered, **gravity conveyors** are one of the most economical material handling solutions. Loads are conveyed on rollers or skate wheels which are mounted in frames.

BENEFITS

- | Does not require a power source
- | Minimal maintenance required
- | Ergonomically safe

NOTE: Additional Sizes and Colors Available Upon Request. Customize to Order.
