

## WIRE DECK

Wire mesh decking is one of the most popular accessories in pallet racking, and is superior to wood decking due to its strength and open mesh/fire safety design. The wire mesh deck support channels (typically 3 or 4 per deck) drop in place on the beam step. The standard wire deck mesh types include: flared channel, flush fit, exterior waterfall, backstop waterfall, and more.

### FEATURES/BENEFITS

- | 2-1/2" X 4" wire pattern supports bottom of the pallets/boxes in a uniform distributed way
- | Provides fall through protection
- | Open wire grid with > 50% open area complies with fire codes regarding overhead fire suppression systems
